

Utshav Paudel

Kathmandu, Nepal

utshav.paudel466@gmail.com | [LinkedIn: utshav-paudel](https://www.linkedin.com/in/utshav-paudel) | github.com/Utshav-paudel

Education

Madan Bhandari Memorial College

Bachelor of Science in Computer Science & Information Technology

Kathmandu, Nepal

Apr. 2022 – Expected Apr. 2026

Experience

MedForce AI

AI Engineer

London, UK (Remote)

Jun. 2025 – Present

- Led the development of a clinical automation platform for an NHS pilot, utilizing Generative AI to streamline workflows and targetting to boost doctor efficiency by 10x.
- Fine-tuned domain-specific LLMs for Hepatologists to automate complex medical reasoning and documentation, significantly reducing manual administrative work.
- Improved system design and model pipelines to ensure the app runs fast and reliably for real-time clinical use.

Digital-Dandelion

AI Engineer

London, UK (Remote)

Feb. 2024 – Jun. 2025

- Built a scalable image classification system on GCP to process 30,000+ dental websites, utilizing computer vision to score website modernization.
- Created an automated ranking system for JLL to identify top-performing real estate offices based on digital presence and metrics.
- Built an agentic AI pipeline for Page & Page to generate creative marketing campaigns for Novo Nordisk, enhancing client engagement strategies.

Omdena

Junior Machine Learning Engineer

New York, USA (Remote)

Jul. 2023 – Sep. 2023

- Led a team in scraping operations to collect a dataset of 46,000+ news articles for NLP analysis.
- Created Nepali language models to capture local idioms and classify news content related to Women and Marginalized groups.
- Designed a scoring model to measure media diversity and sentiment, providing clear metrics to track progress.

The Sparks Foundation

Data Science & Business Analytics Intern

Remote

Jun. 2023 – Jul. 2023

- Conducted data analysis and used supervised learning algorithms to solve business problems.

Projects

MeroDaktar (AI-Powered Medical Platform) | Python, FastAPI, GPT-4, Voice AI

- Built an AI medical consultant using GPT-4 that conducts real-time patient interviews and analyzes symptoms to create preliminary diagnostic reports and appointment booking.
- Implemented a fast voice interaction feature using browser speech tools, allowing hands-free medical consultations.
- Designed a secure backend with FastAPI to manage AI requests and health records, ensuring strict data validation and user security.

Mistral-7B Private RAG | Local LLMs, LangChain, Quantization

- Developed a privacy-focused Chatbot using Mistral-7B to answer questions from private data locally, without sending data to external APIs.
- Set up document processing and search systems to allow the model to find and use the right context for answers.

YouTube Assistant | LangChain, OpenAI, Python

- Created a tool that takes YouTube URLs and automatically generates summaries and answers user questions about the video content.

Technical Skills

Languages: Python, SQL, C++, TypeScript

AI/ML: LLMs, LangChain, RAG, Computer Vision, Supervised Learning, NLP

Cloud & DevOps: Google Cloud Platform (GCP), MLOps, Docker, Git

Frameworks: FastAPI, PyTorch, TensorFlow, Pandas, NumPy, Scikit-learn

Certifications

DeepLearning.AI: Structuring Machine Learning Projects, Supervised Learning

Omdena: AI for Social Good - Improving Representation of Women & Marginalized Groups

Coursera: Data Analysis with Python, Databases and SQL, Python Project for Data Science
